

# **ATTENTION**

*This installation manual includes specific instructions for unpacking, positioning the Chase, and hole locations for products being installed.*

*All holes for mounting products should be drilled before installing products. For Product installation refer to instructions packaged with product.*

**Installation must be done in the following order...**

- A) Unpack and bolt chase to floor.
- B) Mount products to chase.
- C) Install soffit.

**CHASE INSTALLATION**

Unpacking and Installation ..... 3 thru 9

**HOLE LOCATION INFORMATION**

<u>Upper Cabinet</u> .....	10
<u>Dressing Nook</u> .....	11
<u>255 Light</u> .....	12 thru 15
<u>Midmark Dental Light</u> .....	16 thru 19
<u>120/130 LED Treatment Light</u> .....	20 thru 23
<u>Vet Vision DC</u> .....	24 thru 27
<u>VMS/VME Anesthesia Machine and</u> <u>Monitor Mount</u> .....	28 thru 33
<u>Wet and Dry Peninsula Table</u> .....	34
<u>Canis Major</u> .....	35 thru 38
<u>Veterinary Folding Exam Table</u> .....	39 thru 42
<u>Folding Exam Table</u> .....	43 thru 46
<u>Stationary Exam Table</u> .....	46 thru 50
<u>Laptop Tray</u> .....	51 & 52

**SOFFIT INSTALLATION**

Soffit Installation .....53 & 54

# Chase Installation

**Applies to Models:**  
VC (Veterinary Chase)  
**Special Tools:**  
Step Ladder  
Hammer Drill  
Drill & Bits for Floor Type  
Dolly  
Level

**Caution**  
Chase must be mounted securely to the floor. Chase unit weighs 350 lbs (160 kgs), shipping weight 400 lbs (182 kgs). Midmark recommends minimum of two people to move chase unit. Use care when moving to prevent personal injury.

**Note**  
Midmark recommends using a licensed professional to install required plumbing, air and electrical connections for products assembled to the Chase.

**Step 1: Install plumbing and air connections.**  
A) Verify orientation, architectural layout and location of chase installation.  
B) Mark locations of plumbing, air and mounting holes using templates provided.  
C) Install plumbing and air connections.  
  
**Note:** Refer to installation manuals for products that are being mounted to chase for air, water and electrical connection specifications.

Templates 003-2503-00 & 003-2509-00

# Sales Order and Build Date Label Locations

VA1787-1

## Plumbing Access Cut-Out

VA1768-1i

### Equipment Alert

To prevent damage, do not use tools to remove panel.

#### Step 2: Remove access panels.

- A) Pull bottom access panels out.
- B) Pull bottom of top access panels out, lift top up and out to release.
- C) Remove soffit (if applicable), top cover, and part bags from inside of chase.

VA1729-1i

### **Caution**

Chase unit weighs 350 lbs (160 kgs).  
Midmark recommends minimum of two people to move unit.  
Failure to comply may result in personal injury.

### **Step 3: Position chase unit.**

- A) Raise chase up onto dolly, aligning floor brace supports with bottom of dolly.
- B) Verify at least one floor brace is supported by dolly before moving.
- C) Using architectural layout verify orientation of cabinet.
- D) Position chase over air and plumbing connections.

#### Step 4: Mount and level Chase unit.

- A) Drill six holes into floor through floor brace support mounting holes. Use appropriate drill for floor material.
- B) Install mounting bolts at six locations.
- C) Verify chase unit is level and all bolts, mounting and leveling are tightened.  
Refer to leveling procedure if necessary..

#### Leveling Procedure

- A) Loosen support bolts.
- B) Loosen / tighten thread to adjust. Right to lower, left to raise.
- C) Tighten support bolts.

Note: There are four leveling assemblies on both models of chase cabinets.

**Note**

There are two different sides to the chase unit for each model. Sides will be referred as “Fixed side” and “Removable side”. Use this page to help you identify sides.

**Note**

Wood panels are removed for clarity throughout instructions. Do not remove wood panel from fixed side of Chase.

**Pentagonal Model**

**Fixed Side  
(2 sides)**

**Removable  
Side  
(1 side)**

**Rectangular Model**

**Fixed Side  
(2 sides)**

**Removable  
Side  
(2 sides)**

**Caution - Equipment Alert**

*Keep hands clear from front of panels when drilling holes.*

**Step 5: Mount products to chase.**

- A) Refer to the following pages for each product's mounting location on rectangular and pentagonal models.
- B) Drill mounting holes in chase typically from the inside. Drill fixed sides first, then removable sides.  
*Drill holes for all products that will be mounted, then refer to product manual for other product installation steps.*
- C) Install access panels.
- D) Continue with Step 6 after mounting products to chase unit.

*Note: Install products starting with the ones located closest to the top of the chase and work your way down, on the sides without access panels ("Fixed Sides" do not have access panels). Drill product mounting holes from inside chase so you are aligned with holes in the metal frame. Install tables last.*

VA1762i

**Upper Cabinet Installation on Pentagonal or Rectangular on Removable OR Fixed Side**

- A) Install access panels.
- B) Center hanging bracket on panel, side to side.  
Note: Hole locations vary depending on width of hanging bracket / cabinet.
- C) Drill minimum of four, 3/16" holes from inside of chase.
- D) Mount hanging bracket with screws (#10 1-1/4"), washers, and nuts.
- E) Hang cabinet onto hanging bracket.
- F) Secure bottom of cabinet using wood screws.
- G) Door adjustments refer to modular casework installation manual.

Note: Hardware for mounting is provided with chase.

**Dressing Nook Installation on *Pentagonal or Rectangular on Removable OR Fixed Side***

- A) Center hanging bracket on panel, side to side.  
Note: Hole locations vary depending on width of hanging bracket / nook.
- B) Drill minimum of four, 3/16" holes from inside of chase.
- C) Mount hanging bracket with screws (#10 1-1/4"), washers, and nuts.
- D) Hang nook onto hanging bracket.
- E) Secure bottom of nook using wood screws.
- F) Door adjustments refer to modular casework installation manual.

Note: Hardware for mounting is provided with chase.

### **255 Light to Chase (Removable Side Installation on Pentagonal)**

- A) Install access panels.
- B) Drill six, 13/32" holes from inside so you are aligned with holes in metal frame.
- C) Cut square opening in wood panel of chase to conceal light power cord. (optional)
- D) Refer to your Light's Installation Manual for mounting to wood instructions.

*Note: To mount light 3" higher use holes marked with indentation. Ensure there is enough ceiling clearance before mounting.*

**Mounting Hardware is  
Provided with Light**

VA1775i

### **255 Light to Chase (Fixed Side Installation on Pentagonal)**

- A) Drill three, 13/32" holes from inside, on the 90 degree corner mounting side, aligned with holes in metal frame.
- B) Measure over from center of drilled holes 16" and mark. Measure distance down from top of chase to drilled holes. Verify distance from top of chase to marks are the same measurement from top to drilled holes.
- C) Drill three 13/32" holes at marked locations from front of panel on door mounting side.
- D) Cut square opening in wood panel of chase to conceal light power cord. (optional)
- E) Refer to your Light's Installation Manual for mounting to wood instructions..

Note: There is no access for a drill behind the door side. Must measure over from first set of holes and drill from front.

Note: To mount light 3" higher use holes marked with indentation. Ensure there is enough ceiling clearance before mounting.

### **255 Light to Chase (Removable Side Installation on Rectangular)**

- A) Install access panel on side you are drilling in.
- B) Drill six, 13/32" holes from inside so you are aligned with holes in metal frame.
- C) Cut square opening in wood panel of chase to conceal light power cord. (optional)
- D) Refer to your Light's Installation Manual for mounting to wood instructions.

Note: To mount light 3" higher use holes marked with indentation. Ensure there is enough ceiling clearance before mounting.

**Mounting Hardware is  
Provided with Light**

VA1775i

**255 Light to Chase (Fixed Side Installation on Rectangular)**

- A) Drill six, 13/32" holes from inside so you are aligned with holes in metal frame.
- B) Cut square opening in wood panel of chase to conceal light power cord. (optional)
- C) Refer to your Light's Installation Manual for mounting to wood instructions.

Note: To mount light 3" higher use holes marked with indentation. Ensure there is enough ceiling clearance before mounting.

**Mounting Hardware is  
Provided with Light**

VA1775i

**Midmark Dental Light to Chase (Removable Installation on Pentagon)**

- A) Install access panels.
- B) Drill four, 13/32" holes from inside so you are aligned with holes in metal frame.
- C) Cut square opening in wood panel of chase to conceal light power cord. (optional)
- D) Refer to Midmark Dental Light installation manual, wall mount instructions.

**Midmark Dental Light Shown**

**Mounting Hardware is  
Provided with Chase**

VA1775i

**Midmark Dental Light to Chase (Fixed Side Installation on Pentagonal)**

- A) Drill two, 13/32" holes from inside, on the 90 degree corner mounting side, aligned with holes in metal frame.
- B) Measure over from center of drilled holes 16" and mark. Measure distance down from top of chase to drilled holes. Verify distance from top of chase to marked locations are the same measurement from top to drilled holes.
- C) Drill three 13/32" holes at marked locations on door mounting side.
- D) Cut square opening in wood panel of chase to conceal light power cord. (optional)
- E) Refer to Midmark Dental Light installation manual, wall mount instructions.

Note: There is no access for a drill behind the door side. Must measure over from first set of holes and drill from front.

**Midmark Dental  
Light Shown**

**Mounting Hardware is  
Provided with Chase**

VA1775i

**Midmark Dental Light to Chase (Removable Side Installation on Rectangular)**

- A) Install access panel on side you are drilling in.
- B) Drill four, 13/32" holes from inside so you are aligned with holes in metal frame.
- C) Cut square opening in wood panel of chase to conceal light power cord. (optional)
- D) Refer to Midmark Dental Light installation manual, wall mount instructions.

**Mounting Hardware is  
Provided with Chase**

VA1775I

**Midmark Dental Light to Chase (Fixed Side Installation on Rectangular)**

- A) Drill six, 13/32" holes from inside so you are aligned with holes in metal frame.
- B) Cut square opening in wood panel of chase to conceal light power cord. (optional)
- C) Refer to Midmark Dental Light installation manual, wall mount instructions.

**Midmark Dental Light Shown**

**Mounting Hardware is  
Provided with Chase**

VA1775i

**To Conceal Power Cord, Route  
thru 2 1/4" x 3 7/8" Cut-out**

**120/130 LED Treatment Light to Chase (Removable Side Installation on Rectangular)**

- A) Install access panel on side you are drilling in.
- B) Drill four, 13/32" holes from inside so you are aligned with holes in metal frame.
- C) Cut round opening in wood panel of chase to conceal light power cord. (optional)
- D) Refer to 120/130 LED Treatment Light installation manual, wall mount instructions.

**Mounting Hardware is  
Provided with Chase**

VA1775i

**120/130 LED Treatment Light to Chase (Fixed Side Installation on Rectangular)**

- A) Drill four, 13/32" holes from inside so you are aligned with holes in metal frame.
- B) Cut square opening in wood panel of chase to conceal light power cord. (optional)
- C) Refer to 120/130 LED Treatment Light installation manual, wall mount instructions.

**Mounting Hardware is  
Provided with Chase**

VA1775i

**120/130 LED Treatment Light to Chase (Fixed Installation on Pentagonal)**

- A) Install access panels.
- B) Drill four, 13/32" holes from inside so you are aligned with holes in metal frame.
- C) Cut square opening in wood panel of chase to conceal light power cord. (optional)
- D) Refer to 120/130 LED Treatment Light installation manual, wall mount instructions.

VA1775i

**120/130 LED Treatment Light to Chase (Removable Installation on Pentagonal)**

- A) Drill four, 13/32" holes from inside so you are aligned with holes in metal frame.
- B) Cut square opening in wood panel of chase to conceal light power cord. (optional)
- C) Refer to 120/130 LED Treatment Light installation manual, wall mount instructions.

**120/130 LED Treatment Light  
Shown**

**Mounting Hardware is  
Provided with Chase**

VA1775i

**To Conceal Power Cord, Route  
thru 2 1/4" x 3 7/8" Cut-out**

**Vet Vision DC to Chase (Removable Side Installation on Pentagon)**

- A) Install access panels.
- B) Drill six, 13/32" holes from inside so you are aligned with holes in metal frame.
- C) Refer to Vet Vision DC installation manual for mounting instructions.

**Mounting Hardware is  
Provided with Chase**

VA1775i

### **Vet Vision DC to Chase (Fixed Side Installation on Pentagonal)**

- A) Drill three, 13/32" holes from inside, on the 90 degree corner mounting side, aligned with holes in metal frame.
- B) Measure over from center of drilled holes 16" and mark. Measure distance down from top of chase to drilled holes. Verify distance from top of chase to marked locations are the same measurement from top to drilled holes.
- C) Drill three 13/32" holes at marked locations on door mounting side.
- D) Refer to Vet Vision DC installation manual for mounting instructions.

Note: There is no access for a drill behind the door side. Must measure over from first set of holes and drill from front.

**Vet Vision DC to Chase (Removable Side Installation on Rectangular)**

- A) Install access panels on side you are drilling.
- B) Drill six, 13/32" holes from inside so you are aligned with holes in metal frame.
- B) Refer to Vet Vision DC installation manual for mounting instructions.

**Mounting Hardware is  
Provided with Chase**

**Vet Vision DC to Chase (Fixed Side Installation on Rectangular)**

- A) Drill six, 13/32" holes from inside, so you are aligned with holes in metal frame.  
B) Refer to Vet Vision DC installation manual for mounting instructions.

**VMS, VME Anesthesia Machine or Monitor to Chase**  
**(Removable Side Installation on Pentagonal)**

- A) Verify with user if they want unit to be left hand or right hand mounted for VMS or Monitor models.
- B) Install access panel.
- C) Mark holes with pencil from inside chase.
- D) Remove panels.
- E) Drill two 11/32" holes on pencil marks.
- F) Install panel on chase.
- D) Refer to Midmark Anesthesia or Monitor installation manual, wall mount instructions.

Note: Refer to drawing below for VMS, VME, and Monitor hole locations.

**Mounting Hardware is  
Provided with Chase**

**Mounting Hardware is  
Provided with Chase**

**VME**

16"

**90 Degree Corner  
Drill First**

**VME Anesthesia Machine to Chase  
(Fixed Side Installation on Pentagonal)**

- Drill one 11/32" hole from inside, on the 90 degree corner mounting side, aligned with holes in metal frame.
- Measure over from center of drilled holes 16" and mark.
- Verify distance from top of chase to mark is the same measurement from top to drilled hole.
- Drill one 11/32" hole at marked location from front of panel on door mounting side.
- Refer to Midmark Anesthesia installation manual, wall mount instructions.

*Note: There is no access for a drill behind the door side. Must measure over from first set of holes and drill from front. Refer to drawing for VME hole locations.*

**Door Mounting Side**

**VMS Anesthesia Machine or Monitor to Chase**  
**(Fixed Side Installation on Pentagonal)**

**For 90 Degree Corner Side installation of VMS or Monitor...**

- A) Verify with user if they want unit to be Door side or 90 Degree corner side mounted. Door side installation is on next page.
- B) Drill two 11/32" holes from inside so you are aligned with holes in metal frame.
- C) Refer to Midmark Anesthesia or Monitor installation manual, wall Mount instructions.

Note: Refer to drawing for VMS or Monitor hole locations.

**VMS Anesthesia Machine or Monitor to Chase**  
**(Fixed Side Installation on Pentagonal)**

**For Door Side installation of VMS or Monitor...**

- A) Measure down from top of panel and mark at 33 1/2" and 39 3/16" at 4 5/32" from side.
- B) Drill two 11/32" holes at marked locations.
- C) Refer to Midmark Anesthesia or Monitor installation manual, wall mount instructions.

Note: Refer to drawing below for hole locations.

**VMS, VME Anesthesia Machine or Monitor to Chase**  
**(Removable Side Installation on Rectangular)**

- A) Verify with user if they want unit to be left hand or right hand mounted.
- B) Install access panel on side you are drilling in.
- C) Drill two 11/32" holes from inside so you are aligned with holes in metal frame.
- D) Refer to Midmark Anesthesia or Monitor installation manual, wall mount instructions.

Note: Refer to drawing below for VMS, VME and Monitor hole locations.

**VMS, VME Anesthesia Machine or Monitor to Chase**  
**(Fixed Side Installation on Rectangular)**

- A) Verify with user if they want unit to be left hand or right hand mounted.
- B) Drill two 11/32" holes from inside so you are aligned with holes in metal frame.
- C) Refer to Midmark Anesthesia or Monitor installation manual, wall mount instructions.

*Note: Refer to drawing below for VMS, VME and Monitor hole locations.*

### **Wet or Dry Peninsula Table (All Sides)**

- A) Install filler panel on both sides of table.
- B) Center table against chase panel. Level table per table installation instructions.
- C) Drill four, 3/16" holes from inside of table, which will locate in slotted holes.
- D) Refer to Midmark Wet or Dry Treatment Table installation manual, casework (flush mount) and wall mount instructions.

**Wet or Dry Peninsula Table**

**Hole Locations - All Models**

VA1775i

**Canis Major to Chase (Removable Side Installation on Pentagonal)**  
**(Step A for Wet Tables ONLY)**

- A) Install water inlet manifold (installer supplied). Saw opening at 44" from floor.  
B) Refer to Canis Major Wet / Table installation manual for instructions.

**Canis Major to Chase (Fixed Side Installation on Pentagon)**  
**(Step A for Wet Tables ONLY)**

- A) Install water inlet manifold (installer supplied). Saw opening at 44" from floor.  
B) Refer to Canis Major Wet / Table installation manual for instructions.

**Canis Major to Chase (Removable Side Installation on Rectangular)**

(Step A for Wet Tables ONLY)

A) Install water inlet manifold (installer supplied). Saw opening at 44" from floor.

B) Refer to Canis Major Wet Table installation manual for instructions to connect water to table.

**Canis Major to Chase (Fixed Side Installation on Rectangular)**  
**(Step A for Wet Tables ONLY)**

A) Install water inlet manifold (installer supplied). Saw opening at 44" from floor.

B) Refer to Canis Major Wet Table installation manual for instructions to connect water to table.

**Veterinary Folding Exam Table to Chase (Removable Side Installation on Pentagonal)**

- A) Install bottom access panel.
- B) Drill bottom four holes, 13/32", from inside so you are aligned with holes in metal frame.
- C) Measure up 4 3/8" from drilled holes to locate top two holes. Drill two 13/32" holes within slot area.
- D) Refer to Veterinary Folding Exam Table installation manual.

**Mounting Hardware  
Provided with Chase**

VA1775i

**Veterinary Folding Exam Table to Chase (Fixed Side Installation on Pentagonal)**

- Drill bottom four holes, 13/32", from inside so you are aligned with holes in metal frame.
- Measure up 4 3/8" from drilled holes to locate top two holes. Drill two 13/32" holes within slot area.
- Refer to Veterinary Folding Exam Table installation manual.

*Note: Drill is able to access this hole pattern from inside chase at the 90 degree corner. However, there is no access for a drill behind the door side. Must measure over from first set of holes and drill from front.*

**Veterinary Folding Exam Table Shown**

**Veterinary Folding Exam Table to Chase (Removable Side Installation on Rectangular)**

- A) Install bottom access panel.
- B) Drill bottom four holes, 13/32", from inside so you are aligned with holes in metal frame.
- C) Measure up 4 3/8" from drilled holes to locate top two holes. Drill two 13/32" holes within slot area.

## **Install Soffit - for Rectangular Chase**

### ***Step 6: Install top panel and soffit around utilities supplied through ceiling.***

- A) Install top panel by bending split and maneuvering around the utilities dropping from ceiling.*
- B) Screw top panel to the chase and install angle brackets onto the top panel.*
- C) Screw soffits onto the angle brackets.*
- D) Fit the soffit covers together and screw in place surrounding the utilities supplied from the ceiling.*

#### **Note:**

*Soffit may need to be secured to ceiling to prevent it from flexing or shifting. Midmark recommends two people for soffit installation.*

### **Install Soffit - for Pentagonal Chase**

#### **Step 6: Install top panel and soffit around utilities supplied through ceiling.**

- A) Break apart the top panel and screw one half to the top of the chase.
- B) Screw the second half of the top panel onto the chase\*.
- C) Install angle bracket(s) onto the top panel.
- D) Install the soffit covers to surround the utilities routed down from the ceiling.

\* Study how the soffit assembly pieces will fit against the ceiling and install them in the order that works best for this installation. You may have to vary from the order shown here.

**Top Panel for Chase  
with utilities supplied  
through the floor**

#### **Note:**

Soffit may need to be secured to ceiling to prevent it from flexing or shifting. Midmark recommends two people for soffit installation.
