To install...

A) Route wire harness up thru flex arm to lighthead.
B) Install split retainers on flex arm, slide flex arm into light post and secure with two set screws.
C) Place lighthead onto flex arm, crimp electrical connections and secure lighthead with nylon washer, plain washer, ground terminal ring, and nut.

Note: Wire harness must be routed thru nylon washer, plain washer, ground terminal ring, and nut before crimping electrical connectors.

To complete...

A) Install bulb and front bezel.
B) Plug in power cord and check for proper operation.
